

uPVC Corrugated Flexible Pipe

Active's Corrugated Flexible Pipe is manufactured to comply with IEC 61386-22 : 2002. It is an ideal replacement to conduit pipes.

Our Corrugated Pipes are designed to provide excellent flexibility, high rigidity, good electrical characteristics, heat and chemical resistance, high impact and combustion strength, lightweight and corrosive free. These characteristics render various operations, like transportation, handling and laying even at considerable depths, easy and fast installation.

Pack in clear film wrapping, our pipes are supplied in coils of continuous lengths to enable easy handling and to minimize use of fittings. Sizes are available in a complete range with outside diameter from 16 mm to 50 mm in three standard colours of black, white and grey.

uPVC Corrugated Flexible Pipe

Code No	Outer Diameter	Standard Coil
AFP16	16mm	50m
AFP20	20mm	50m
AFP25	25mm	50m
